

Risk Education for Schools of Architecture

Pro-Demnity assists Schools of Architecture to deliver programs or presentations on risk topics that are aligned with curriculum.

Our presentations augment the student experience by integrating real-world scenarios and actual case studies to academic learning.

In partnership with Schools of Architecture we can customize presentations, facilitate discussions, or lead workshops on a wide variety of current topics and issues that bring theory to life through practical case studies and from our depth of experience in protecting and defending architects.

Contact us to learn more about how we can work with your School of Architecture to design and deliver content aligned with risk education learning objectives for your architecture or architectural technology students.

Disclaimer:
